DOCKETED BY

DOCKET NO. L-00000B-21-0393-00197

IN THE MATTER OF THE APPLICATION OF
SALT RIVER PROJECT AGRICULTURAL
IMPROVEMENT AND POWER DISTRICT, IN
CONFORMANCE WITH THE REQUIREMENTS
OF ARIZONA REVISED STATUTES,
SECTIONS 40-360, ET SEQ., FOR A
CERTIFICATE OF ENVIRONMENTAL
COMPATIBILITY AUTHORIZING THE
EXPANSION OF THE COOLIDGE
GENERATING STATION, A NATURAL GAS-
FIRED, SIMPLE-CYCLE POWER PLANT NEAR
COOLIDGE, ARIZONA, THAT WAS BUILT
BETWEEN 2009 AND 2011 AND PURCHASED
BY SRP IN 2019 TO HELP SUPPORT
GROWING DEMAND FOR POWER IN THE
REGION.

RECEIVED
2022 APR - 4 P 12:57
AZ CORP COMMISSION
DOCKET CONTROL

HEARING DIVISION'S NOTICE OF
FILING SAMPLE FORMS OF
ORDER FOR CASE NO. 197

BY THE COMMISSION:

On February 23, 2022, the Arizona Power Plant and Transmission Line Siting Committee ("Committee") issued a Certificate of Environmental Compatibility ("CEC") to the Salt River Project Agricultural Improvement and Power District ("SRP") authorizing the expansion of the Coolidge Generating Station, all within the City of Coolidge, Pinal County, Arizona.

On February 25, 2022, and March 10, 2022, Randolph Residents and Sierra Club, respectively, filed requests for review of the Committee Decision by the Arizona Corporation Commission ("Commission") pursuant to A.R.S. § 40-360.07(B).

Pursuant to the requests for review of the CEC proceeding, the Commission heard public comment and oral argument on the issues presented during its March 15 and 16, 2022, Open Meeting.

The Commission's Hearing Division hereby provides sample forms of orders for the Commission's convenience when considering its review of the above-captioned matter. Sample Order No. 1 is in format suitable for Commission approval of the CEC as issued by the Committee. Sample

1 Order No. 2 is in format to allow for Commission modifications to the CEC. Sample Order No. 3 is in
2 format suitable for Commission denial of the CEC.

3 This matter has been tentatively scheduled for consideration by the Commission at the Open
4 Meeting scheduled for April 12 and 13, 2022.

5 DATED this 4th day of April, 2022.

the Public Interest to Approve the
Project CEC as Issued by the Siting
Committee’s Decision)**

15 Open Meeting
16 April 12 and 13, 2022
17 Phoenix, Arizona

BY THE COMMISSION:

18 The Arizona Corporation Commission (“Commission”) has conducted its review, pursuant to
19 A.R.S. § 40-360.07. Pursuant to A.R.S. § 40-360.07(B), the Commission in compliance with A.R.S. §
20 40-360.06 and in balancing the broad public interest and the need for adequate, economical and reliable
21 supply of electric power with the desire to minimize the effect thereof on the environment and ecology
22 of the state, finds that the above-captioned Application for a Certificate of Environmental Compatibility
23 (“CEC”) for siting approval is hereby approved.

DISCUSSION

Background

26 On December 13, 2021, Salt River Project Agricultural Improvement and Power District
27 (“SRP”) filed an Application for a CEC to expand its Coolidge Generating Station, a natural gas-fired
28 simple-cycle power plant located in Coolidge, Arizona (“Coolidge Expansion Project”, “CEP” or

1 “Project”).¹ The CEP consists of 16 General Electric 1.M6000 PC SPRINT NxGen individual simple-
2 cycle combustion turbine generator units, each producing up to 51.25 megawatts (MWs), for a total of
3 820 MWs, and associated interconnection facilities including new 500 kV transmission lines and a new
4 500 kV switchyard, which SRP may later convert to a 500/230 kV substation. The new generation units
5 will be located immediately adjacent to and south of the existing units at the Coolidge Generating
6 Station. Sixteen stacks, approximately 85 feet tall, will be located adjacent to the combustion turbine
7 generator units. The Project will be located entirely on land owned by SRP. SRP states that the CEP
8 will allow SRP to meet near-term capacity needs in its service territory which is among the fastest
9 growing regions in the nation while providing needed capacity and reliability to facilitate the
10 integration of additional renewable resources.²

11 The Coolidge Generating Station, and the CEP are located in Coolidge, but the closest
12 community to the plant is the unincorporated community of Randolph. Randolph is a historic Black
13 community, currently with approximately 150 residents, established in the 1920s.

14 Sierra Club, Western Resource Advocates (“WRA”), residents of Randolph (“Randolph
15 Residents”), and the Commission’s Utilities Division (“Staff”) are intervenors in this matter.

16 On December 16, 2021, the Chairman of the Power Plant and Transmission Line Siting
17 Committee (“Committee”) set a hearing on the Application for CEC to commence on January 18, 2022,
18 in Casa Grande, Arizona. Following a Motion for Continuance filed by Sierra Club on December 20,
19 2021, which motion was joined by WRA and Randolph Residents, the hearing was continued to
20 commence on February 7, 2022.

21 On January 12, 2022, Staff filed a letter in response to a request from the Committee Chairman
22 for comments on whether the Project will improve the reliability and/or safety of the operation of the
23 grid. In its response, Staff concluded that it was unable to fully comment on whether the Project could
24 improve the reliability and safety of the grid or delivery of power in Arizona, but Staff agreed that the
25 CEP would allow SRP to have the ability to fast-ramp generation and can provide system reliability in
26 nearly all conditions.

27 _____
28 ¹ CEC Application SRP Exhibit (“Ex”) 1 in the Committee Hearing.

² SRP Ex 1, Ex A at 3.

1 The hearing convened as scheduled on February 7, 2022, and continued through February 16,
2 2022.

3 At the hearing before the Committee, SRP presented the testimony of 10 witnesses. John
4 Coggins, SRP's Associate General Manager and Chief Power System Executive, testified about the
5 importance of reliability, SRP's generation portfolio, the significance of near-term growth in SRP's
6 service territory, and transformational changes facing the electric industry. Grant Smedley, SRP's
7 Director of Resource Planning, Acquisition and Development, testified about the need for the CEP,
8 resource planning considerations and how the plant would complement SRP's battery storage
9 resources. Bill McClellan, SRP's CEP Project Manager, testified about the project's descriptions and
10 the benefits of using existing infrastructure; Angie Bond-Simpson, SRP's Director of Integrated
11 System Planning and Support, testified about planning for reliability, how SRP evaluates resource
12 options, and the alternative resource analyses that SRP conducted. Christina Hallows, SRP's manager
13 of Public Involvement, and Anne Rickard, SRP's Director of Community Partnership, testified about
14 public notice and outreach. Devin Petry, Senior Project Manager with SWCA Environmental
15 Consultants ("SWCA"), testified about environmental studies conducted by SWCA in support of the
16 CEP. Kristin Watt, SRP's Manager of Air Quality, testified about the air permit application and the
17 ambient air quality modeling assessment and existing air quality in the CEP area. Kendra Pollio,
18 Principal with KP Environmental, testified about her involvement in the initial siting of the Coolidge
19 Generating Stations and her assessment of the CEP's effects on the Randolph community. Robert
20 Olson, SRP's Director of Supply and Trading of Fuel, testified about fuel supplies during specific times
21 of constraint.

22 Sierra Club offered the testimony of three witnesses. Rob Gramlich, president of Grid
23 Strategies, LLC, testified concerning the technical and cost aspects of the CEP including the project's
24 proposed objective, the technical practicality of achieving that objective and methods available for
25 achieving that objective. Sandy Bahr, director of Sierra Club's Grand Canyon Chapter, testified about
26 the environmental impacts of the CEP, including impacts relative to water, air quality and public health.
27 Cara Bottorff, a senior electric sector analyst for Sierra Club, testified about the estimated health
28

1 impacts of changes to emissions from the CEP as modeled by the Environmental Protection Agency's
2 Co-Benefits Risk Assessment ("COBRA") tool.

3 WRA presented the testimony of Alexander Routhier, WRA's Senior Clean Energy Policy
4 Analyst, who testified about the public health impact of greenhouse gases and the effects of failing to
5 reduce greenhouse gas emissions.

6 Randolph Residents offered the testimony of eight witnesses. Ron Jordan and Melvin Moore,
7 long-term residents of Randolph, testified about the history of Randolph and the impact of the existing
8 plant on families, health, and property values, and the community's objection to the CEP. Dagney
9 Signorelli, environmental justice chair of the Social Justice and Engineering Initiative and a former
10 employee of Pinal County Air Quality Control, testified about air quality in Pinal County and the
11 impacts of exposure to particulate matter. Mark Stapp, a real estate economist, development expert,
12 and professor of real estate at Arizona State University, testified about his studies that identified
13 negative externalities resulting from proximity to power plants and about the historical and planned
14 development in the Pinal County/Randolph area and the long-term impact on property values. Timothy
15 Collins, professor of geography and environmental and sustainability studies at the University of Utah,
16 testified about environmental justice and patterns of inequities for Black Americans due to exposure to
17 pollution and disproportionate exposure to various air pollutants relevant to the CEP. Sara Grineski,
18 professor of sociology and environmental studies at the University of Utah, testified about the
19 disproportionate health conditions suffered by Black Americans due to environmental causes such as
20 exposure to natural gas fired power plants and about the predicted air pollution emissions within the
21 CEC application and their corresponding health implications; Adrienne Hollis, principal of Hollis
22 Environmental Consulting Services, LLC, testified about the nature of environmental contamination
23 exposure and the importance of maintaining the history of African American communities and other
24 communities of color. Stephanie Malin, associate professor of sociology at Colorado State University,
25 testified about community impacts of fossil fuel production, particularly on rural communities.

26 Andrew Smith, an engineering supervisor for Staff, testified about the requirement for an
27 updated power flow analysis and system impact study and that Staff did not evaluate alternatives to the
28 CEP when it evaluated impacts on the grid and the reliability of the Project.

1 At the conclusion of the hearing, the Committee voted 7 to 2 to approve the CEC.

2 On February 23, 2022, the Committee issued a CEC for the CEP, which is attached hereto as
3 Exhibit A, authorizing the CEP subject to certain conditions.

4 On February 24, 2022, the Commission's Legal Division filed Staff's Notice of Filing Sample
5 Forms of Order for Case No. 197.

6 Also on February 24, 2022, SRP filed a Request for Consideration at Special Open Meeting,
7 requesting that the Commission consider the CEC on March 25, 2022.

8 On February 25, 2022, Randolph Residents filed an Opposition to Request for Consideration at
9 Special Open Meeting on March 25, 2022, requesting that the matter be heard at the Commission's
10 Regular Open Meeting scheduled on April 12-13, 2022, to give Randolph Residents sufficient time to
11 consider the impact of the conditions in the CEC.

12 On the same date, pursuant to A.R.S. § 40-360.07(A), Randolph Residents filed a Request for
13 Review of the Line-Siting Committee Decision by the Corporation Commission. Randolph Residents
14 requested that pursuant to A.R.S. § 40-360.07(B), the Commission request written briefs or oral
15 argument.

16 On February 28, 2022, by Procedural Order, the parties were ordered to file briefs by March
17 14, 2022, public comment was set for March 15, 2022, during the Commission's regularly scheduled
18 Open Meeting, and oral argument was set for March 16, 2022, during the second day of the
19 Commission's March Open Meeting.

20 On March 10, 2022, Sierra Club filed a Request for Review of Arizona Power Plant and Line
21 Siting Committee Decision pursuant to A.R.S. § 40-360.07(B). Sierra Club did not request a change in
22 the schedule for briefs or oral argument.

23 On March 14, 2022, SRP, Randolph Residents, Sierra Club, and WRA filed briefs.

24 On March 15, 2022, during the Commission's Open Meeting, telephonic public comment was
25 received. The majority of callers opposed the proposed CEP, either for environmental reasons or due
26 to the impacts on the local Randolph community.

27 On March 16, 2022, during the Commission's Open Meeting, Randolph Residents, Sierra Club,
28 WRA, Staff, and SRP appeared through counsel before the Commission for oral argument on the

1 review pursuant to A.R.S. § 40-360.07(B). Following oral argument, the Commission took the matter
2 under advisement for consideration at a subsequent Open Meeting.

3 In its brief and in oral argument, Randolph Residents assert that the Committee did not meet
4 the statutory standards of A.R.S. § 40-360.06. Specifically, Randolph Residents argue that A.R.S. §
5 40-360.06(A)(1) requires the consideration of private developments planned near the CEP. They state
6 that SRP did not include information about such private developments in its application and that the
7 Committee did not consider them, in violation of A.R.S. § 40-360.06(A)(1).³ Randolph Residents
8 claim that SRP did not investigate actual noise levels but only performed modeling for increases in
9 noise and that testimony from Randolph Residents witnesses refuted the conclusion that the increased
10 noise would be barely perceptible and as a result, A.R.S. § 40-360.06(A)(3) which requires
11 consideration of noise levels, is not adequately addressed in the CEC as issued.⁴ In addition, Randolph
12 Residents argue that the CEC does not adequately address the testimony of Randolph Residents
13 witnesses about historic homes, the culture of the area, and view impacts, and thus, the CEC fails to
14 comply with A.R.S. § 40-360.06(A)(5) which requires that scenic areas and historic sites and structures
15 be considered.⁵ Randolph Residents argue that A.R.S. § 40-360.06(A)(6) which requires consideration
16 of the total environment of the area was not properly addressed in light of testimony about declining
17 housing values, increasing health risks and decreasing neighborhood well-being.⁶ Furthermore,
18 Randolph Residents argue that discrimination and environmental justice are factors that must be
19 considered under A.R.S. § 40-360.06(A)(9) which requires consideration of additional factors under
20 applicable federal and state laws.⁷ Concerning this point, Randolph Residents cited to testimony about
21 the extensive industrial encroachment on the Randolph community over time, disparities caused by
22 environmental injustice and the impact of pollution resulting in poorer health consequences, and a lack
23 of robust engagement with the community by SRP, resulting in paltry offers of compensation in
24 comparison to what SRP has provided to white communities.⁸ Randolph Residents argue that the CEC

25 ³ Randolph Residents Brief at 2.

26 ⁴ Randolph Residents Brief at 3-5.

27 ⁵ Randolph Resident Brief at 5-7.

28 ⁶ Randolph Residents Brief at 8-12.

⁷ Randolph Residents Brief at 13.

⁸ Randolph Residents Brief at 15 *citing* Decision No. 63611(May 1, 2001)(concerning SRP San Tan Generating Station in Gilbert, Az).

1 for the Project should be denied because damages cannot adequately compensate for the injuries
2 suffered as a result of going forward with the Project, but if the Project is approved, the residents must
3 receive compensation for their losses.

4 Sierra Club presents the following five primary reasons for denial of the CEC: (1) the overall
5 environmental impact; (2) the location-specific environmental impacts; (3) the flawed and rushed
6 process by which SRP selected the Project to meet its need for peaking capacity; (4) SRP's failure to
7 consider and its rejection of reasonable alternatives to the CEP; and (5) the legally deficient CEC
8 Application. Sierra Club cites to evidence presented to the Committee concerning the projected
9 negative and cumulative health impacts from increased air pollution, climate change, noise pollution,
10 visual and light pollution, and water consumption.⁹ Sierra Club also argues that the specific location of
11 the CEP is inappropriate as it is within 1000 feet of the historically Black Randolph community and
12 less than a half mile from the Arizona Training Program – a home and care facility for disabled persons.
13 Sierra Club also points to the lack of outreach to the Randolph community as compared to the process
14 SRP engaged in with the more affluent community of Gilbert.¹⁰ Further, Sierra Club notes that even
15 though SRP had adequate time to conduct an all-source RFP, SRP failed to use the RFP process which
16 Sierra Club argues is the best way to secure new capacity.¹¹ Sierra Club points to testimony that there
17 are alternatives to the CEP that would have significantly reduced environmental impacts and that SRP
18 did not fairly evaluate.¹² Finally, Sierra Club argues that no party could confirm that SRP filed the
19 power flow study required by A.R.S. § 40-360.02 and, thus, the CEC application was legally
20 deficient.¹³

21 WRA argues that the evidence in this matter weighs in favor of denying the CEC because the
22 Project presents unreasonable risks to the total environment of the area by worsening and speeding the
23 impacts of climate change. More specifically, WRA cites to evidence that approval of the CEP, which
24 is expected to result in the addition of over one-half million tons of CO₂ annually, will contribute to
25

26 ⁹ Sierra Club Brief at 2-10.

27 ¹⁰ Sierra Club Brief at 11.

28 ¹¹ Sierra Club Brief at 12-13.

¹² Sierra Club Brief at 13-17.

¹³ Sierra Club Brief at 17-18.

1 extreme heat, prolonged drought, decreased crop yields and increased wildfire risk.¹⁴ WRA cites Sierra
2 Club's testimony that SRP could obtain the same reliability as it expects from the CEP, at a lower cost,
3 by using solar panels and battery storage.¹⁵

4 SRP argues that given the current economic development activity in Arizona, the Project is
5 urgently needed for SRP to meet rapid load growth.¹⁶ SRP states that reliability is critical and that it is
6 pursuing a strategy to acquire an array of resource types while reducing its carbon footprint. SRP states
7 that it will need over 700 MW of additional power by 2023 and an additional 300 MW by 2025.¹⁷ SRP
8 asserts that the CEP is needed to help SRP reliably integrate more renewable resources because the
9 intermittent nature of solar and wind means they cannot be counted on as firm generation to meet
10 demand. SRP disputes Sierra Club's contention that battery storage would provide the same benefits
11 as the CEP, and moreover, states that SRP is adding 450 MW of battery storage in the next two years.¹⁸
12 SRP asserts that the CEP is neither the cause nor a contributor to the past mistreatment of the Randolph
13 community, and that the Committee correctly found that the environmental effects of the expansion
14 project will be minimal.¹⁹ SRP states that it is committed to assisting Randolph with community
15 improvements. SRP notes that the CEC as issued contains several conditions that are modeled on those
16 included for the Gilbert San Tan Generating Station, including commitments to limit nighttime
17 construction noise (CEC Condition 13) and provide public access to emergency and safety plans and
18 emissions monitoring data (CEC Conditions 16 and 17). SRP asserts that the Project is environmentally
19 compatible with the surrounding area because it is being constructed on an existing generation site
20 which minimizes the impacts from additional transmission facilities or pipelines.²⁰ SRP argues that its
21 site-specific analyses demonstrate that the CEP will have minimal environmental effects and will not
22 negatively affect human health or the environment.²¹ In support, SRP points to testimony that the
23 Project will use minimal water, that emissions will not cause or contribute to exceedance of the National

1 Ambient Air Quality Standards, that the Project is on SRP's land and will not affect whether the
2 Randolph community receives historical designation, and that the Project does not use or create
3 significant amounts of chemicals or hazardous materials.

4 On March 15, 2022, at the request of Commissioner O'Connor, Randolph Residents filed a
5 Supplement outlining possible amelioration conditions that could be included in the CEC should it be
6 granted.

7 On March 28, 2022, Commissioner O'Connor filed a letter in the docket requesting that SRP
8 and any other interested parties, file responses to the Supplement filed by Randolph Residents.

9 **Standard for Review**

10 In determining whether to support a new CEC, the Commission is guided by A.R.S. § 40-360.06
11 and § 40-360.07(B). Together these statutes require the Commission to determine the environmental
12 impact and need for the proposed project. Specifically, A.R.S. § 40-360.07(B) states that "[i]n arriving
13 at its decision, the commission shall comply with the provisions of [A.R.S.] § 40-360.06 and shall
14 balance in the broad public interest, the need for an adequate, economical and reliable supply of electric
15 power with the desire to minimize the effect thereof on the environment and ecology of this state."

16 After its review of the record and consideration of the arguments of the parties, the Commission
17 finds that the Committee considered the evidence presented and appropriately balanced the
18 requirements of A.R.S. § 40-360.06 and that the CEC should be approved as submitted by the
19 Committee.

20 **Findings of Fact**

21 1. SRP will need additional capacity to meet a growing load demand in its service territory
22 in the next several years. According to SRP, it needs a flexible and firm resource to maintain reliable
23 service in its service area and facilitate the integration of more renewable resources.

24 2. The proposed CEP will have some impacts on the total environment of the area, the
25 state, and local residents due to increased noise levels during construction and operation of the Project;
26 additional lighting; emissions of greenhouse gases; and effects on air quality, views, and property
27 values.

28 3. The CEC issued by the Committee contains conditions that include, *inter alia*, the

1 following provisions designed to ameliorate the impacts of the Project on the local community:

- 2 a. SRP shall establish a Community Working Group ("CWG") to implement a
3 landscaping plan to visually screen the Project and mitigate noise and provide
4 landscaping in Randolph public areas; reduce impacts of plant lighting within limits
5 required for plant and employee safety; provide a grant writer to help the Randolph
6 community seek federal and state support to address community needs; and
7 implement job training and skills development for the residents of Randolph
8 (Condition 8).
- 9 b. Subject to the approval of Pinal County and the City of Coolidge, SRP shall pave
10 roads within the Randolph community, including Randolph Road between Arizona
11 Boulevard and Vail Road, and Vail Road between Randolph Road and Klick Road
12 (Condition 9).
- 13 c. SRP shall establish an annual scholarship program for Randolph residents with
14 qualifications and timeliness established by the CWG (Condition 10).
- 15 d. SPR shall support efforts to establish Arizona and National Historic Designations
16 for Randolph (Condition 11).
- 17 e. In consultation with the CWG, SRP shall facilitate discussions with Pinal County,
18 the City of Coolidge and other appropriate authorities regarding infrastructure
19 improvements for the Randolph community (Condition 12).
- 20 f. SRP shall operate the Project so that during normal operations the Project shall
21 comply with OSHA worker safety noise standards and agrees to use reasonable
22 efforts to minimize nighttime construction noise (Condition 13).

23 4. After review of the entirety of the record, including the briefs and oral arguments on
24 review, we are unpersuaded that the CEC as issued by the Committee should be denied or further
25 amended.

26 5. The conditions contained in the CEC as issued by the Committee are adequate to protect
27 the environment and the public as required by A.R.S. §§ 40-360.06 and 40-360.07(B).

28 ...

Conclusions of Law

1
2 1. The record supports a finding that on balance, the broad public interest favors granting
3 the CEC in this matter when all the factors set forth in A.R.S. § 40-360.06 are considered along with
4 the need for an adequate, economical, and reliable supply of electric power.

5 2. The conditions placed upon the CEC as issued by the Committee are sufficient to weigh
6 the balancing of the public interest in favor of granting the CEC in this matter when all the factors set
7 forth in A.R.S. § 40-360.06 are considered along with the need for an adequate, economical, and
8 reliable supply of electric power.

9 3. The CEC issued by the Committee should be confirmed and approved by the
10 Commission.

Order

11
12 IT IS THEREFORE ORDERED that the above-captioned Application for a Certificate of

Open Meeting
April 12 and 13, 2022
Phoenix, Arizona

BY THE COMMISSION:

The Arizona Corporation Commission (“Commission”) has conducted its review, pursuant to A.R.S. § 40-360.07. Pursuant to A.R.S. § 40-360.07(B), the Commission in compliance with A.R.S. § 40-360.06 and in balancing the broad public interest, the need for adequate, economical and reliable supply of electric power with the desire to minimize the effect thereof on the environment and ecology of the state, finds that the above-captioned Application for a Certificate of Environmental Compatibility (“CEC”) for siting approval is hereby approved with additional modifications.

DISCUSSION

Background

On December 13, 2021, Salt River Project Agricultural Improvement and Power District (“SRP”) filed an Application for a CEC to expand its Coolidge Generating Station, a natural gas-fired simple-cycle power plant located in Coolidge, Arizona (“Coolidge Expansion Project”, “CEP” or

1 “Project”).¹ The CEP consists of 16 General Electric 1.M6000 PC SPRINT NxGen individual simple-
2 cycle combustion turbine generator units, each producing up to 51.25 megawatts (MWs), for a total of
3 820 MWs, and associated interconnection facilities including new 500 kV transmission lines and a new
4 500 kV switchyard, which SRP may later convert to a 500/230 kV substation. The new generation units
5 will be located immediately adjacent to and south of the existing units at the Coolidge Generating
6 Station. Sixteen stacks, approximately 85 feet tall, will be located adjacent to the combustion turbine
7 generator units. The Project will be located entirely on land owned by SRP. SRP states that the CEP
8 will allow SRP to meet near-term capacity needs in its service territory which is among the fastest
9 growing regions in the nation while providing needed capacity and reliability to facilitate the
10 integration of additional renewable resources.²

11 The Coolidge Generating Station, and the CEP are located in Coolidge, but the closest
12 community to the plant is the unincorporated community of Randolph. Randolph is a historic Black
13 community, currently with approximately 150 residents, established in the 1920s.

14 Sierra Club, Western Resource Advocates (“WRA”), residents of Randolph (“Randolph
15 Residents”), and the Commission’s Utilities Division (“Staff”) are intervenors in this matter.

16 On December 16, 2021, the Chairman of the Power Plant and Transmission Line Siting
17 Committee (“Committee”) set a hearing on the Application for CEC to commence on January 18, 2022,
18 in Casa Grande, Arizona. Following a Motion for Continuance filed by Sierra Club on December 20,
19 2021, which motion was joined by WRA and Randolph Residents, the hearing was continued to
20 commence on February 7, 2022.

21 On January 12, 2022, Staff filed a letter in response to a request from the Committee Chairman
22 for comments on whether the Project will improve the reliability and/or safety of the operation of the
23 grid. In its response, Staff concluded that it was unable to fully comment on whether the Project could
24 improve the reliability and safety of the grid or delivery of power in Arizona, but Staff agreed that the
25 CEP would allow SRP to have the ability to fast-ramp generation and can provide system reliability in
26 nearly all conditions.

27 _____
28 ¹ CEC Application SRP Exhibit (“Ex”) 1 in the Committee Hearing.

² SRP Ex 1, Ex A at 3.

1 The hearing convened as scheduled on February 7, 2022, and continued through February 16,
2 2022.

3 At the hearing before the Committee, SRP presented the testimony of 10 witnesses. John
4 Coggins, SRP's Associate General Manager and Chief Power System Executive, testified about the
5 importance of reliability, SRP's generation portfolio, the significance of near-term growth in SRP's
6 service territory, and transformational changes facing the electric industry. Grant Smedley, SRP's
7 Director of Resource Planning, Acquisition and Development, testified about the need for the CEP,
8 resource planning considerations and how the plant would complement SRP's battery storage
9 resources. Bill McClellan, SRP's CEP Project Manager, testified about the project's descriptions and
10 the benefits of using existing infrastructure; Angie Bond-Simpson, SRP's Director of Integrated
11 System Planning and Support, testified about planning for reliability, how SRP evaluates resource
12 options, and the alternative resource analyses that SRP conducted. Christina Hallows, SRP's manager
13 of Public Involvement, and Anne Rickard, SRP's Director of Community Partnership, testified about
14 public notice and outreach. Devin Petry, Senior Project Manager with SWCA Environmental
15 Consultants ("SWCA"), testified about environmental studies conducted by SWCA in support of the
16 CEP. Kristin Watt, SRP's Manager of Air Quality, testified about the air permit application and the
17 ambient air quality modeling assessment and existing air quality in the CEP area. Kendra Pollio,
18 Principal with KP Environmental, testified about her involvement in the initial siting of the Coolidge
19 Generating Stations and her assessment of the CEP's effects on the Randolph community. Robert
20 Olson, SRP's Director of Supply and Trading of Fuel, testified about fuel supplies during specific times
21 of constraint.

22 Sierra Club offered the testimony of three witnesses. Rob Gramlich, president of Grid
23 Strategies, LLC, testified concerning the technical and cost aspects of the CEP including the project's
24 proposed objective, the technical practicality of achieving that objective and methods available for
25 achieving that objective. Sandy Bahr, director of Sierra Club's Grand Canyon Chapter, testified about
26 the environmental impacts of the CEP, including impacts relative to water, air quality and public health.
27 Cara Bottorff, a senior electric sector analyst for Sierra Club, testified about the estimated health
28

1 impacts of changes to emissions from the CEP as modeled by the Environmental Protection Agency's
2 Co-Benefits Risk Assessment ("COBRA") tool.

3 WRA presented the testimony of Alexander Routhier, WRA's Senior Clean Energy Policy
4 Analyst, who testified about the public health impact of greenhouse gases and the effects of failing to
5 reduce greenhouse gas emissions.

6 Randolph Residents offered the testimony of eight witnesses. Ron Jordan and Melvin Moore,
7 long-term residents of Randolph, testified about the history of Randolph and the impact of the existing
8 plant on families, health, and property values, and the community's objection to the CEP. Dagney
9 Signorelli, environmental justice chair of the Social Justice and Engineering Initiative and a former
10 employee of Pinal County Air Quality Control, testified about air quality in Pinal County and the
11 impacts of exposure to particulate matter. Mark Stapp, a real estate economist, development expert,
12 and professor of real estate at Arizona State University, testified about his studies that identified
13 negative externalities resulting from proximity to power plants and about the historical and planned
14 development in the Pinal County/Randolph area and the long-term impact on property values. Timothy
15 Collins, professor of geography and environmental and sustainability studies at the University of Utah,
16 testified about environmental justice and patterns of inequities for Black Americans due to exposure to
17 pollution and disproportionate exposure to various air pollutants relevant to the CEP. Sara Grineski,
18 professor of sociology and environmental studies at the University of Utah, testified about the
19 disproportionate health conditions suffered by Black Americans due to environmental causes such as
20 exposure to natural gas fired power plants and about the predicted air pollution emissions within the
21 CEC application and their corresponding health implications; Adrienne Hollis, principal of Hollis
22 Environmental Consulting Services, LLC, testified about the nature of environmental contamination
23 exposure and the importance of maintaining the history of African American communities and other
24 communities of color. Stephanie Malin, associate professor of sociology at Colorado State University,
25 testified about community impacts of fossil fuel production, particularly on rural communities.

26 Andrew Smith, an engineering supervisor for Staff, testified about the requirement for an
27 updated power flow analysis and system impact study and that Staff did not evaluate alternatives to the
28 CEP when it evaluated impacts on the grid and the reliability of the Project.

1 At the conclusion of the hearing, the Committee voted 7 to 2 to approve the CEC.

2 On February 23, 2022, the Committee issued a CEC for the CEP, which is attached hereto as
3 Exhibit A, authorizing the CEP subject to certain conditions.

4 On February 24, 2022, the Commission's Legal Division filed Staff's Notice of Filing Sample
5 Forms of Order for Case No. 197.

6 Also on February 24, 2022, SRP filed a Request for Consideration at Special Open Meeting,
7 requesting that the Commission consider the CEC on March 25, 2022.

8 On February 25, 2022, Randolph Residents filed an Opposition to Request for Consideration at
9 Special Open Meeting on March 25, 2022, requesting that the matter be heard at the Commission's
10 Regular Open Meeting scheduled on April 12-13, 2022, to give Randolph Residents sufficient time to
11 consider the impact of the conditions in the CEC.

12 On the same date, pursuant to A.R.S. § 40-360.07(A), Randolph Residents filed a Request for
13 Review of the Line-Siting Committee Decision by the Corporation Commission. Randolph Residents
14 requested that pursuant to A.R.S. § 40-360.07(B), the Commission request written briefs or oral
15 argument.

16 On February 28, 2022, by Procedural Order, the parties were ordered to file briefs by March
17 14, 2022, public comment was set for March 15, 2022, during the Commission's regularly scheduled
18 Open Meeting, and oral argument was set for March 16, 2022, during the second day of the
19 Commission's March Open Meeting.

20 On March 10, 2022, Sierra Club filed a Request for Review of Arizona Power Plant and Line
21 Siting Committee Decision pursuant to A.R.S. § 40-360.07(B). Sierra Club did not request a change in
22 the schedule for briefs or oral argument.

23 On March 14, 2022, SRP, Randolph Residents, Sierra Club, and WRA filed briefs.

24 On March 15, 2022, during the Commission's Open Meeting, telephonic public comment was
25 received. The majority of callers opposed the proposed CEP, either for environmental reasons or due
26 to the impacts on the local Randolph community.

27 On March 16, 2022, during the Commission's Open Meeting, Randolph Residents, Sierra Club,
28 WRA, Staff, and SRP appeared through counsel before the Commission for oral argument on the

1 review pursuant to A.R.S. § 40-360.07(B). Following oral argument, the Commission took the matter
2 under advisement for consideration at a subsequent Open Meeting.

3 In its brief and in oral argument, Randolph Residents assert that the Committee did not meet
4 the statutory standards of A.R.S. § 40-360.06. Specifically, Randolph Residents argue that A.R.S. §
5 40-360.06(A)(1) requires the consideration of private developments planned near the CEP. They state
6 that SRP did not include information about such private developments in its application and that the
7 Committee did not consider them, in violation of A.R.S. § 40-360.06(A)(1).³ Randolph Residents
8 claim that SRP did not investigate actual noise levels but only performed modeling for increases in
9 noise and that testimony from Randolph Residents witnesses refuted the conclusion that the increased
10 noise would be barely perceptible and as a result, A.R.S. § 40-360.06(A)(3) which requires
11 consideration of noise levels, is not adequately addressed in the CEC as issued.⁴ In addition, Randolph
12 Residents argue that the CEC does not adequately address the testimony of Randolph Residents
13 witnesses about historic homes, the culture of the area, and view impacts, and thus, the CEC fails to
14 comply with A.R.S. § 40-360.06(A)(5) which requires that scenic areas and historic sites and structures
15 be considered.⁵ Randolph Residents argue that A.R.S. § 40-360.06(A)(6) which requires consideration
16 of the total environment of the area was not properly addressed in light of testimony about declining
17 housing values, increasing health risks and decreasing neighborhood well-being.⁶ Furthermore,
18 Randolph Residents argue that discrimination and environmental justice are factors that must be
19 considered under A.R.S. § 40-360.06(A)(9) which requires consideration of additional factors under
20 applicable federal and state laws.⁷ Concerning this point, Randolph Residents cited to testimony about
21 the extensive industrial encroachment on the Randolph community over time, disparities caused by
22 environmental injustice and the impact of pollution resulting in poorer health consequences, and a lack
23 of robust engagement with the community by SRP, resulting in paltry offers of compensation in
24 comparison to what SRP has provided to white communities.⁸ Randolph Residents argue that the CEC

25 ³ Randolph Residents Brief at 2.

26 ⁴ Randolph Residents Brief at 3-5.

27 ⁵ Randolph Resident Brief at 5-7.

28 ⁶ Randolph Residents Brief at 8-12.

⁷ Randolph Residents Brief at 13.

⁸ Randolph Residents Brief at 15 *citing* Decision No. 63611(May 1, 2001)(concerning SRP San Tan Generating Station in Gilbert, Az).

1 for the Project should be denied because damages cannot adequately compensate for the injuries
2 suffered as a result of going forward with the Project, but if the Project is approved, the residents must
3 receive compensation for their losses.

4 Sierra Club presents the following five primary reasons for denial of the CEC: (1) the overall
5 environmental impact; (2) the location-specific environmental impacts; (3) the flawed and rushed
6 process by which SRP selected the Project to meet its need for peaking capacity; (4) SRP's failure to
7 consider and its rejection of reasonable alternatives to the CEP; and (5) the legally deficient CEC
8 Application. Sierra Club cites to evidence presented to the Committee concerning the projected
9 negative and cumulative health impacts from increased air pollution, climate change, noise pollution,
10 visual and light pollution, and water consumption.⁹ Sierra Club also argues that the specific location of
11 the CEP is inappropriate as it is within 1000 feet of the historically Black Randolph community and
12 less than a half mile from the Arizona Training Program – a home and care facility for disabled persons.
13 Sierra Club also points to the lack of outreach to the Randolph community as compared to the process
14 SRP engaged in with the more affluent community of Gilbert.¹⁰ Further, Sierra Club notes that even
15 though SRP had adequate time to conduct an all-source RFP, SRP failed to use the RFP process which
16 Sierra Club argues is the best way to secure new capacity.¹¹ Sierra Club points to testimony that there
17 are alternatives to the CEP that would have significantly reduced environmental impacts and that SRP
18 did not fairly evaluate.¹² Finally, Sierra Club argues that no party could confirm that SRP filed the
19 power flow study required by A.R.S. § 40-360.02 and, thus, the CEC application was legally
20 deficient.¹³

21 WRA argues that the evidence in this matter weighs in favor of denying the CEC because the
22 Project presents unreasonable risks to the total environment of the area by worsening and speeding the
23 impacts of climate change. More specifically, WRA cites to evidence that approval of the CEP, which
24 is expected to result in the addition of over one-half million tons of CO₂ annually, will contribute to
25

26 ⁹ Sierra Club Brief at 2-10.

27 ¹⁰ Sierra Club Brief at 11.

¹¹ Sierra Club Brief at 12-13.

¹² Sierra Club Brief at 13-17.

28 ¹³ Sierra Club Brief at 17-18.

1 extreme heat, prolonged drought, decreased crop yields and increased wildfire risk.¹⁴ WRA cites Sierra
2 Club's testimony that SRP could obtain the same reliability as it expects from the CEP, at a lower cost,
3 by using solar panels and battery storage.¹⁵

4 SRP argues that given the current economic development activity in Arizona, the Project is
5 urgently needed for SRP to meet rapid load growth.¹⁶ SRP states that reliability is critical and that it is
6 pursuing a strategy to acquire an array of resource types while reducing its carbon footprint. SRP states
7 that it will need over 700 MW of additional power by 2023 and an additional 300 MW by 2025.¹⁷ SRP
8 asserts that the CEP is needed to help SRP reliably integrate more renewable resources because the
9 intermittent nature of solar and wind means they cannot be counted on as firm generation to meet
10 demand. SRP disputes Sierra Club's contention that battery storage would provide the same benefits
11 as the CEP, and moreover, states that SRP is adding 450 MW of battery storage in the next two years.¹⁸
12 SRP asserts that the CEP is neither the cause nor a contributor to the past mistreatment of the Randolph
13 community, and that the Committee correctly found that the environmental effects of the expansion
14 project will be minimal.¹⁹ SRP states that it is committed to assisting Randolph with community
15 improvements. SRP notes that the CEC as issued contains several conditions that are modeled on those
16 included for the Gilbert San Tan Generating Station, including commitments to limit nighttime
17 construction noise (CEC Condition 13) and provide public access to emergency and safety plans and
18 emissions monitoring data (CEC Conditions 16 and 17). SRP asserts that the Project is environmentally
19 compatible with the surrounding area because it is being constructed on an existing generation site
20 which minimizes the impacts from additional transmission facilities or pipelines.²⁰ SRP argues that its
21 site-specific analyses demonstrate that the CEP will have minimal environmental effects and will not
22 negatively affect human health or the environment.²¹ In support, SRP points to testimony that the
23 Project will use minimal water, that emissions will not cause or contribute to exceedance of the National

1 Ambient Air Quality Standards, that the Project is on SRP's land and will not affect whether the
2 Randolph community receives historical designation, and that the Project does not use or create
3 significant amounts of chemicals or hazardous materials.

4 On March 15, 2022, at the request of Commissioner O'Connor, Randolph Residents filed a
5 Supplement outlining possible amelioration conditions that could be included in the CEC should it be
6 granted.

7 On March 28, 2022, Commissioner O'Connor filed a letter in the docket requesting that SRP
8 and any other interested parties, file responses to the Supplement filed by Randolph Residents.

9 **Standard for Review**

10 In determining whether to approve a new CEC, the Commission is guided by A.R.S. § 40-
11 360.06 and § 40-360.07 (B). Together these statutes require the Commission to determine the
12 environmental impact and need for the proposed project. Specifically, A.R.S. § 40-360.07(B) states
13 that "[i]n arriving at its decision, the commission shall comply with the provisions of A.R.S. § 40-
14 360.06 and shall balance in the broad public interest, the need for an adequate, economical and reliable
15 supply of electric power with the desire to minimize the effect thereof on the environment and ecology
16 of this state."

17 After its review of the record and consideration of the arguments of the parties, the Commission
18 finds that additional conditions to mitigate the impacts resulting from the Project are necessary to find
19 that the CEP meets the standard to approve the Project required by A.R.S. § 40-360.07(B).
20 Consequently, the Commission approves the CEC as modified by this Order.

21 **Findings of Fact**

22 1. SRP will need additional capacity to meet a growing load demand in its service territory
23 in the next several years. According to SRP, it needs a flexible and firm resource to maintain reliable
24 service in its service area and facilitate the integration of more renewable resources.

25 2. The proposed CEP will affect the total environment of the area and state and have
26 significant negative impacts on residents in Randolph from noise levels during construction and
27 operation of the Project, increased lighting, emissions of greenhouse gases, worsened air quality,
28 degraded views, and lower property values.

1 3. Further, the record indicates that the residents of Randolph, a historically Black
2 community, have not been treated equitably with other more affluent white communities located in
3 proximity to similar projects, and that Randolph citizens have suffered increased negative impacts on
4 human health, their community and the environment as a result of the disparate treatment.

5 4. The greatest impact from the construction and operation of the CEP will be borne by
6 the residents of Randolph.

7 5. The CEC issued by the Committee contains conditions that include, *inter alia*, the
8 following provisions designed to ameliorate the impacts of the Project on the local community:

- 9 a. SRP shall establish a Community Working Group (“CWG”) to implement a
10 landscaping plan to visually screen the Project and mitigate noise and provide
11 landscaping in Randolph public areas; reduce impacts of plant lighting within limits
12 required for plant and employee safety; provide a grant writer to help the Randolph
13 community seek federal and state support to address community needs; and
14 implement job training and skills development for the residents of Randolph
15 (Condition 8).
- 16 b. Subject to the approval of Pinal County and the City of Coolidge, SRP shall pave
17 roads within the Randolph community, including Randolph Road between Arizona
18 Boulevard and Vail Road, and Vail Road between Randolph Road and Klick Road
19 (Condition 9).
- 20 c. SRP shall establish an annual scholarship program for Randolph residents with
21 qualifications and timeliness established by the CWG (Condition 10).
- 22 d. SPR shall support efforts to establish Arizona and National Historic Designations
23 for Randolph (Condition 11).
- 24 e. In consultation with the CWG, SRP shall facilitate discussions with Pinal County,
25 the City of Coolidge and other appropriate authorities regarding infrastructure
26 improvements for the Randolph community (Condition 12).
- 27 f. SRP shall operate the Project so that during normal operations the Project shall
28 comply with OSHA worker safety noise standards and agrees to use reasonable

1 efforts to minimize nighttime construction noise (Condition 13).

2 6. The CEC, as issued, does not address funding levels for the recommended impact
3 mitigation factors, nor does it define or establish the scope of SRP's obligation to "support" or
4 "facilitate" efforts of the Randolph community.²² Additionally, the CEC does not even attempt to set
5 forth the types of "reasonable efforts" that could be used to minimize nighttime construction noise.

6 7. The Commission finds that as issued by the Committee, the CEC' does not include
7 conditions that adequately protect the residents of Randolph from the negative impacts of the CEP.

8 8. The Commission modifies the CEC by deleting conditions X, XX, and XXX and
9 substituting the following conditions:

10

11

12 9. The Commission modifies the CEC by adding Conditions X, XX, and XXX, as follows:

13

14 10. After review of the entirety of the record, including the briefs and oral arguments on
15 review, we find that the CEC, as modified herein, should be approved.

16

Conclusions of Law

17 1. The Project aids the state in meeting the need for an adequate, economical, and reliable
18 supply of electric power.

19 2. In balancing the need for the Project with its effect on the environment and ecology of
20 the state, the Commission has imposed modified conditions on the CEC that effectively minimize the
21 Project's impact on the environment and ecology of the state and are in the broad public interest.

22 3. The modified conditions placed on the CEC by the Commission resolve issues raised
23 during the course of this proceeding concerning the need for the Project and its impact on the
24 environment and ecology of the state.

25

26 ²² In contrast, when SRP was granted a CEC to expand its San Tan Generation Station in Gilbert, SRP was required to
27 develop with the Town of Gilbert a continuous fund to the construction and maintenance of landscaping, SRP was ordered
28 not to reduce the overall level of visual mitigation, the timing of tree planting was specified, noise mitigation was more
specifically described, SRP was obligated to contribute a minimum of \$330,000 to assist the Gilbert Unified School District
in converting school buses to green diesel, SRP was required to contribute up to \$400,000 to fund a Regional Public Transit
Authority.

4. With the modified conditions imposed on the CEC herein, the balancing in the broad public interest required by A.R.S. § 40-360.07(B) favors granting the CEC.

Order

IT IS THEREFORE ORDERED that the Certificate of Environmental Compatibility issued by the Power Plant and Transmission Line Siting Committee, and attached hereto as Exhibit A, shall be modified as described in Findings of Fact Nos. 8 and 9 and as set forth in Exhibit B.

IT IS FURTHER ORDERED that the modified Certificate of Environmental Compatibility attached hereto as Exhibit B and incorporated herein, is approved.

IT IS FURTHER ORDERED that this Decision shall be effective immediately.

BY ORDER OF THE ARIZONA CORPORATION COMMISSION.

DECISION NO. _____

ORDER

**(Sample Form of Order 3 -- for the
Convenience of the Commission to Use
if the Commission Determines it is in
the Public Interest to Deny the Project
a CEC as Issued by the Siting
Committee's Decision)**

15 Open Meeting
16 April 12 and 13, 2022
17 Phoenix, Arizona

18 **BY THE COMMISSION:**

19 The Arizona Corporation Commission ("Commission") has conducted its review, pursuant to
20 A.R.S. § 40-360.07. Pursuant to A.R.S. § 40-360.07(B), the Commission in compliance with A.R.S. §
21 40-360.06 and in balancing the broad public interest and the need for adequate, economical, and reliable
22 supply of electric power with the desire to minimize the effect thereof on the environment and ecology
23 of the state, finds that the above-captioned Application for a Certificate of Environmental Compatibility
24 ("CEC") for siting approval is hereby denied.

25 **DISCUSSION**

26 **Background**

27 On December 13, 2021, Salt River Project Agricultural Improvement and Power District
28 ("SRP") filed an Application for a CEC to expand its Coolidge Generating Station, a natural gas-fired
simple-cycle power plant located in Coolidge, Arizona ("Coolidge Expansion Project", "CEP" or

1 “Project”).¹ The CEP consists of 16 General Electric 1.M6000 PC SPRINT NxGen individual simple-
2 cycle combustion turbine generator units, each producing up to 51.25 megawatts (MWs), for a total of
3 820 MWs, and associated interconnection facilities including new 500 kV transmission lines and a new
4 500 kV switchyard, which SRP may later convert to a 500/230 kV substation. The new generation units
5 will be located immediately adjacent to and south of the existing units at the Coolidge Generating
6 Station. Sixteen stacks, approximately 85 feet tall, will be located adjacent to the combustion turbine
7 generator units. The Project will be located entirely on land owned by SRP. SRP states that the CEP
8 will allow SRP to meet near-term capacity needs in its service territory which is among the fastest
9 growing regions in the nation while providing needed capacity and reliability to facilitate the
10 integration of additional renewable resources.²

11 The Coolidge Generating Station, and the CEP are located in Coolidge, but the closest
12 community to the plant is the unincorporated community of Randolph. Randolph is a historic Black
13 community, currently with approximately 150 residents, established in the 1920s.

14 Sierra Club, Western Resource Advocates (“WRA”), residents of Randolph (“Randolph
15 Residents”), and the Commission’s Utilities Division (“Staff”) are intervenors in this matter.

16 On December 16, 2021, the Chairman of the Power Plant and Transmission Line Siting
17 Committee (“Committee”) set a hearing on the Application for CEC to commence on January 18, 2022,
18 in Casa Grande, Arizona. Following a Motion for Continuance filed by Sierra Club on December 20,
19 2021, which motion was joined by WRA and Randolph Residents, the hearing was continued to
20 commence on February 7, 2022.

21 On January 12, 2022, Staff filed a letter in response to a request from the Committee Chairman
22 for comments on whether the Project will improve the reliability and/or safety of the operation of the
23 grid. In its response, Staff concluded that it was unable to fully comment on whether the Project could
24 improve the reliability and safety of the grid or delivery of power in Arizona, but Staff agreed that the
25 CEP would allow SRP to have the ability to fast-ramp generation and can provide system reliability in
26 nearly all conditions.

27 _____
28 ¹ CEC Application SRP Exhibit (“Ex”) 1 in the Committee Hearing.

² SRP Ex 1, Ex A at 3.

1 The hearing convened as scheduled on February 7, 2022, and continued through February 16,
2 2022.

3 At the hearing before the Committee, SRP presented the testimony of 10 witnesses. John
4 Coggins, SRP's Associate General Manager and Chief Power System Executive, testified about the
5 importance of reliability, SRP's generation portfolio, the significance of near-term growth in SRP's
6 service territory, and transformational changes facing the electric industry. Grant Smedley, SRP's
7 Director of Resource Planning, Acquisition and Development, testified about the need for the CEP,
8 resource planning considerations and how the plant would complement SRP's battery storage
9 resources. Bill McClellan, SRP's CEP Project Manager, testified about the project's descriptions and
10 the benefits of using existing infrastructure; Angie Bond-Simpson, SRP's Director of Integrated
11 System Planning and Support, testified about planning for reliability, how SRP evaluates resource
12 options, and the alternative resource analyses that SRP conducted. Christina Hallows, SRP's manager
13 of Public Involvement, and Anne Rickard, SRP's Director of Community Partnership, testified about
14 public notice and outreach. Devin Petry, Senior Project Manager with SWCA Environmental
15 Consultants ("SWCA"), testified about environmental studies conducted by SWCA in support of the
16 CEP. Kristin Watt, SRP's Manager of Air Quality, testified about the air permit application and the
17 ambient air quality modeling assessment and existing air quality in the CEP area. Kendra Pollio,
18 Principal with KP Environmental, testified about her involvement in the initial siting of the Coolidge
19 Generating Stations and her assessment of the CEP's effects on the Randolph community. Robert
20 Olson, SRP's Director of Supply and Trading of Fuel, testified about fuel supplies during specific times
21 of constraint.

22 Sierra Club offered the testimony of three witnesses. Rob Gramlich, president of Grid
23 Strategies, LLC, testified concerning the technical and cost aspects of the CEP including the project's
24 proposed objective, the technical practicality of achieving that objective and methods available for
25 achieving that objective. Sandy Bahr, director of Sierra Club's Grand Canyon Chapter, testified about
26 the environmental impacts of the CEP, including impacts relative to water, air quality and public health.
27 Cara Bottorff, a senior electric sector analyst for Sierra Club, testified about the estimated health
28

1 impacts of changes to emissions from the CEP as modeled by the Environmental Protection Agency's
2 Co-Benefits Risk Assessment ("COBRA") tool.

3 WRA presented the testimony of Alexander Routhier, WRA's Senior Clean Energy Policy
4 Analyst, who testified about the public health impact of greenhouse gases and the effects of failing to
5 reduce greenhouse gas emissions.

6 Randolph Residents offered the testimony of eight witnesses. Ron Jordan and Melvin Moore,
7 long-term residents of Randolph, testified about the history of Randolph and the impact of the existing
8 plant on families, health, and property values, and the community's objection to the CEP. Dagney
9 Signorelli, environmental justice chair of the Social Justice and Engineering Initiative and a former
10 employee of Pinal County Air Quality Control, testified about air quality in Pinal County and the
11 impacts of exposure to particulate matter. Mark Stapp, a real estate economist, development expert,
12 and professor of real estate at Arizona State University, testified about his studies that identified
13 negative externalities resulting from proximity to power plants and about the historical and planned
14 development in the Pinal County/Randolph area and the long-term impact on property values. Timothy
15 Collins, professor of geography and environmental and sustainability studies at the University of Utah,
16 testified about environmental justice and patterns of inequities for Black Americans due to exposure to
17 pollution and disproportionate exposure to various air pollutants relevant to the CEP. Sara Grineski,
18 professor of sociology and environmental studies at the University of Utah, testified about the
19 disproportionate health conditions suffered by Black Americans due to environmental causes such as
20 exposure to natural gas fired power plants and about the predicted air pollution emissions within the
21 CEC application and their corresponding health implications; Adrienne Hollis, principal of Hollis
22 Environmental Consulting Services, LLC, testified about the nature of environmental contamination
23 exposure and the importance of maintaining the history of African American communities and other
24 communities of color. Stephanie Malin, associate professor of sociology at Colorado State University,
25 testified about community impacts of fossil fuel production, particularly on rural communities.

26 Andrew Smith, an engineering supervisor for Staff, testified about the requirement for an
27 updated power flow analysis and system impact study and that Staff did not evaluate alternatives to the
28 CEP when it evaluated impacts on the grid and the reliability of the Project.

1 At the conclusion of the hearing, the Committee voted 7 to 2 to approve the CEC.

2 On February 23, 2022, the Committee issued a CEC for the CEP, which is attached hereto as
3 Exhibit A, authorizing the CEP subject to certain conditions.

4 On February 24, 2022, the Commission's Legal Division filed Staff's Notice of Filing Sample
5 Forms of Order for Case No. 197.

6 Also on February 24, 2022, SRP filed a Request for Consideration at Special Open Meeting,
7 requesting that the Commission consider the CEC on March 25, 2022.

8 On February 25, 2022, Randolph Residents filed an Opposition to Request for Consideration at
9 Special Open Meeting on March 25, 2022, requesting that the matter be heard at the Commission's
10 Regular Open Meeting scheduled on April 12-13, 2022, to give Randolph Residents sufficient time to
11 consider the impact of the conditions in the CEC.

12 On the same date, pursuant to A.R.S. § 40-360.07(A), Randolph Residents filed a Request for
13 Review of the Line-Siting Committee Decision by the Corporation Commission. Randolph Residents
14 requested that pursuant to A.R.S. § 40-360.07(B), the Commission request written briefs or oral
15 argument.

16 On February 28, 2022, by Procedural Order, the parties were ordered to file briefs by March
17 14, 2022, public comment was set for March 15, 2022, during the Commission's regularly scheduled
18 Open Meeting, and oral argument was set for March 16, 2022, during the second day of the
19 Commission's March Open Meeting.

20 On March 10, 2022, Sierra Club filed a Request for Review of Arizona Power Plant and Line
21 Siting Committee Decision pursuant to A.R.S. § 40-360.07(B). Sierra Club did not request a change in
22 the schedule for briefs or oral argument.

23 On March 14, 2022, SRP, Randolph Residents, Sierra Club, and WRA filed briefs.

24 On March 15, 2022, during the Commission's Open Meeting, telephonic public comment was
25 received. The majority of callers opposed the proposed CEP, either for environmental reasons or due
26 to the impacts on the local Randolph community.

27 On March 16, 2022, during the Commission's Open Meeting, Randolph Residents, Sierra Club,
28 WRA, Staff, and SRP appeared through counsel before the Commission for oral argument on the

1 review pursuant to A.R.S. § 40-360.07(B). Following oral argument, the Commission took the matter
2 under advisement for consideration at a subsequent Open Meeting.

3 In its brief and in oral argument, Randolph Residents assert that the Committee did not meet
4 the statutory standards of A.R.S. § 40-360.06. Specifically, Randolph Residents argue that A.R.S. §
5 40-360.06(A)(1) requires the consideration of private developments planned near the CEP. They state
6 that SRP did not include information about such private developments in its application and that the
7 Committee did not consider them, in violation of A.R.S. § 40-360.06(A)(1).³ Randolph Residents
8 claim that SRP did not investigate actual noise levels but only performed modeling for increases in
9 noise and that testimony from Randolph Residents witnesses refuted the conclusion that the increased
10 noise would be barely perceptible and as a result, A.R.S. § 40-360.06(A)(3) which requires
11 consideration of noise levels, is not adequately addressed in the CEC as issued.⁴ In addition, Randolph
12 Residents argue that the CEC does not adequately address the testimony of Randolph Residents
13 witnesses about historic homes, the culture of the area, and view impacts, and thus, the CEC fails to
14 comply with A.R.S. § 40-360.06(A)(5) which requires that scenic areas and historic sites and structures
15 be considered.⁵ Randolph Residents argue that A.R.S. § 40-360.06(A)(6) which requires consideration
16 of the total environment of the area was not properly addressed in light of testimony about declining
17 housing values, increasing health risks and decreasing neighborhood well-being.⁶ Furthermore,
18 Randolph Residents argue that discrimination and environmental justice are factors that must be
19 considered under A.R.S. § 40-360.06(A)(9) which requires consideration of additional factors under
20 applicable federal and state laws.⁷ Concerning this point, Randolph Residents cited to testimony about
21 the extensive industrial encroachment on the Randolph community over time, disparities caused by
22 environmental injustice and the impact of pollution resulting in poorer health consequences, and a lack
23 of robust engagement with the community by SRP, resulting in paltry offers of compensation in
24 comparison to what SRP has provided to white communities.⁸ Randolph Residents argue that the CEC

25 ³ Randolph Residents Brief at 2.

26 ⁴ Randolph Residents Brief at 3-5.

27 ⁵ Randolph Resident Brief at 5-7.

28 ⁶ Randolph Residents Brief at 8-12.

⁷ Randolph Residents Brief at 13.

⁸ Randolph Residents Brief at 15 citing Decision No. 63611(May 1, 2001)(concerning SRP San Tan Generating Station in Gilbert, Az).

1 for the Project should be denied because damages cannot adequately compensate for the injuries
2 suffered as a result of going forward with the Project, but if the Project is approved, the residents must
3 receive compensation for their losses.

4 Sierra Club presents the following five primary reasons for denial of the CEC: (1) the overall
5 environmental impact; (2) the location-specific environmental impacts; (3) the flawed and rushed
6 process by which SRP selected the Project to meet its need for peaking capacity; (4) SRP's failure to
7 consider and its rejection of reasonable alternatives to the CEP; and (5) the legally deficient CEC
8 Application. Sierra Club cites to evidence presented to the Committee concerning the projected
9 negative and cumulative health impacts from increased air pollution, climate change, noise pollution,
10 visual and light pollution, and water consumption.⁹ Sierra Club also argues that the specific location of
11 the CEP is inappropriate as it is within 1000 feet of the historically Black Randolph community and
12 less than a half mile from the Arizona Training Program – a home and care facility for disabled persons.
13 Sierra Club also points to the lack of outreach to the Randolph community as compared to the process
14 SRP engaged in with the more affluent community of Gilbert.¹⁰ Further, Sierra Club notes that even
15 though SRP had adequate time to conduct an all-source RFP, SRP failed to use the RFP process which
16 Sierra Club argues is the best way to secure new capacity.¹¹ Sierra Club points to testimony that there
17 are alternatives to the CEP that would have significantly reduced environmental impacts and that SRP
18 did not fairly evaluate.¹² Finally, Sierra Club argues that no party could confirm that SRP filed the
19 power flow study required by A.R.S. § 40-360.02 and, thus, the CEC application was legally
20 deficient.¹³

21 WRA argues that the evidence in this matter weighs in favor of denying the CEC because the
22 Project presents unreasonable risks to the total environment of the area by worsening and speeding the
23 impacts of climate change. More specifically, WRA cites to evidence that approval of the CEP, which
24 is expected to result in the addition of over one-half million tons of CO₂ annually, will contribute to
25

26 ⁹ Sierra Club Brief at 2-10.

27 ¹⁰ Sierra Club Brief at 11.

¹¹ Sierra Club Brief at 12-13.

¹² Sierra Club Brief at 13-17.

28 ¹³ Sierra Club Brief at 17-18.

1 extreme heat, prolonged drought, decreased crop yields and increased wildfire risk.¹⁴ WRA cites Sierra
2 Club's testimony that SRP could obtain the same reliability as it expects from the CEP, at a lower cost,
3 by using solar panels and battery storage.¹⁵

4 SRP argues that given the current economic development activity in Arizona, the Project is
5 urgently needed for SRP to meet rapid load growth.¹⁶ SRP states that reliability is critical and that it is
6 pursuing a strategy to acquire an array of resource types while reducing its carbon footprint. SRP states
7 that it will need over 700 MW of additional power by 2023 and an additional 300 MW by 2025.¹⁷ SRP
8 asserts that the CEP is needed to help SRP reliably integrate more renewable resources because the
9 intermittent nature of solar and wind means they cannot be counted on as firm generation to meet
10 demand. SRP disputes Sierra Club's contention that battery storage would provide the same benefits
11 as the CEP, and moreover, states that SRP is adding 450 MW of battery storage in the next two years.¹⁸
12 SRP asserts that the CEP is neither the cause nor a contributor to the past mistreatment of the Randolph
13 community, and that the Committee correctly found that the environmental effects of the expansion
14 project will be minimal.¹⁹ SRP states that it is committed to assisting Randolph with community
15 improvements. SRP notes that the CEC as issued contains several conditions that are modeled on those
16 included for the Gilbert San Tan Generating Station, including commitments to limit nighttime
17 construction noise (CEC Condition 13) and provide public access to emergency and safety plans and
18 emissions monitoring data (CEC Conditions 16 and 17). SRP asserts that the Project is environmentally
19 compatible with the surrounding area because it is being constructed on an existing generation site
20 which minimizes the impacts from additional transmission facilities or pipelines.²⁰ SRP argues that its
21 site-specific analyses demonstrate that the CEP will have minimal environmental effects and will not
22 negatively affect human health or the environment.²¹ In support, SRP points to testimony that the
23 Project will use minimal water, that emissions will not cause or contribute to exceedance of the National

1 Ambient Air Quality Standards, that the Project is on SRP's land and will not affect whether the
2 Randolph community receives historical designation, and that the Project does not use or create
3 significant amounts of chemicals or hazardous materials.

4 On March 15, 2022, at the request of Commissioner O'Connor, Randolph Residents filed a
5 Supplement outlining possible amelioration conditions that could be included in the CEC should it be
6 granted.

7 On March 28, 2022, Commissioner O'Connor filed a letter in the docket requesting that SRP
8 and any other interested parties file responses to the Supplement filed by Randolph Residents.

9 **Standard for Review**

10 In determining whether to support a new CEC, the Commission is guided by A.R.S. § 40-360.06
11 and § 40-360.07(B). Together these statutes require the Commission to determine the environmental
12 impact and need for the proposed project. Specifically, A.R.S. § 40-360.07(B) states that "[i]n arriving
13 at its decision, the commission shall comply with the provisions of [A.R.S.] § 40-360.06 and shall
14 balance in the broad public interest, the need for an adequate, economical and reliable supply of electric
15 power with the desire to minimize the effect thereof on the environment and ecology of this state."

16 After our review of the record and consideration of the arguments of the parties, the
17 Commission finds that the CEC application submitted by SRP is not complete and the record is not
18 sufficient to allow the Commission to find that the Coolidge Expansion Project meets the standard
19 required by A.R.S. § 40-360.07(B) to approve the project. The Commission finds that the record does
20 not contain sufficient information to allow the Commission to find that the CEP is an economical
21 supply of power because the power flow and stability analysis required by A.R.S. §40-360.02 (C)(7)
22 was not part of the record, a full copy of the E3 analysis was not given to the SRP board prior to
23 approval of the project by the board or to the Committee (and thus also is not part of the record), and
24 SRP did not issue an All Source Request for Proposals ("ASRFP") prior to determining to go forward
25 with the CEP and thus neither considered nor provided the Committee sufficient information regarding
26 any feasible and potentially economical alternatives. Further, we find that regardless of the
27 completeness of the application, the conditions contained in the CEC as issued do not go far enough
28 for us to find that the need for additional reliable generation outweighs the negative impacts on the

1 environment and people of the surrounding community and the state. Consequently, the Commission
2 must deny the CEC as presented.

3 **Findings of Fact**

4 1. SRP will need additional capacity to meet a growing load demand in its service territory
5 in the next several years. According to SRP, it needs a flexible resource to maintain reliable service in
6 its service area and facilitate the integration of more renewable resources.

7 2. SRP admits that it did not perform an ASRFP prior to its board voting to proceed with
8 the CEP even though its 2018 Integrated Resource Plan specifies that the utility should go through an
9 all-source RFP for new contracts for new-build generation.²²

10 3. SRP states that it did not issue an ASRFP, or any RFP, for the CEP because it had older
11 RFPs that provided it with sufficient data to proceed with the CEP.²³ Data from older RFPs that SRP
12 relied upon for its decision to construct the CEP are not part of the record in this matter.

13 4. The record shows that SRP contracted with E3 to conduct an analysis to determine how
14 much solar and storage would be needed to provide the equivalent reliability of the CEP.²⁴ Neither the
15 SRP board, prior to voting to proceed with the CEP, nor the Committee, was given a complete copy of
16 the E3 study.

17 5. SRP states that it conducted and submitted a Power Flow and Stability Study which
18 A.R.S. § 40-360-02(C)(7) requires to be filed 90 days prior to filing an Application for CEC. However,
19 the record does not show that the Study was provided to the Commission, reviewed by Staff, or
20 available to any other party in connection with the consideration of the Project.

21 6. Without the results of an ASRFP, the E3 Study, and the Power Flow and Stability Study,
22 the record is not sufficient for the Commission to determine the economics of the CEP and whether
23 there are alternatives available that would provide the same capacity, responsiveness, and reliability
24 for SRP's customers but would be less costly and would potentially have less adverse impacts on the
25 local residents or the environment and ecology of the state.

26 7. The evidence of record shows that the proposed CEP will negatively affect the total

27 ²² LS Hearing Transcript ("Tr.") Vol. I at 83:7; Tr Vol. II at 273:24-274:8.

28 ²³ Tr. Vol I at 82:1-83:11.

²⁴ Tr. Vol. VII at 1120:25-1121:3.

environment of the area and state and have significant negative impacts on residents in Randolph from noise levels during construction and operation of the Project, increased lighting, emissions of greenhouse gases, worsened air quality, degraded views, and lower property values. Further, the record indicates that the residents of Randolph, a historically Black community, have not been treated equitably with other more affluent white communities located in proximity to similar projects, and that Randolph citizens have suffered increased negative impacts on human health, their community and the environment as a result of the disparate treatment.

8. The conditions contained in the CEC as issued do not adequately compensate the citizens of Randolph for the damages they would incur as a result of approving the Project and as such, the balance of the need for adequate, economical and reliable power with the effects on the total environment does not weigh in favor of approving the CEC.

Conclusions of Law

1. The evidence in the record is not sufficient to weigh the balancing of the public interest in favor of granting the CEC in this matter when all the factors set forth in A.R.S. § 40-360.06 are considered along with the need for an adequate, economical, and reliable supply of electric power.

2. The conditions placed upon the CEC as issued by the Committee are not sufficient to weigh the balancing of the public interest in favor of granting the CEC in this matter when all the factors set forth in A.R.S. § 40-360.06 are considered along with the need for an adequate, economical, and reliable supply of electric power.

3. The incomplete record as identified above and the negative impacts of the Project compel balancing the competing public interests in favor of protecting the people, environment and ecology of the State of Arizona by denying Applicant a CEC.

4. The CEC issued by the Siting Committee should not be confirmed and approved by the Commission.

Order

IT IS THEREFORE ORDERED that the above captioned Application for a Certificate of Environmental Compatibility is denied.

IT IS FURTHER ORDERED that the Certification of Environmental Compatibility issued by

1 the Power Plant and Transmission Line Siting Committee, attached hereto as Exhibit A and
2 incorporated herein, is denied.

3 IT IS FURTHER ORDERED that this Decision shall become effective immediately.

AND TRANSMISSION LINE SITING COMMITTEE**

| | |
|---|--|
| IN THE MATTER OF THE APPLICATION OF SALT RIVER PROJECT AGRICULTURAL IMPROVEMENT AND POWER DISTRICT, IN CONFORMANCE WITH THE REQUIREMENTS OF ARIZONA REVISED STATUTES, SECTIONS 40- 360, et. seq., FOR A CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY AUTHORIZING THE EXPANSION OF THE COOLIDGE GENERATING STATION, ALL WITHIN THE CITY OF COOLIDGE, PINAL COUNTY, ARIZONA. | Docket No. L-00000B-21-0393-00197 Case No. 197 CERTIFICATE OF ENVIRONMENTAL COMPATIBILITY |
|---|--|

A. INTRODUCTION.

Pursuant to notice given as provided by law, the Arizona Power Plant and Transmission Line Siting Committee (Committee) held a public hearing on February 7, 2022, through February 16, 2022, in Casa Grande, Arizona, in conformance with the requirements of Arizona Revised Statutes (A.R.S.) §§ 40-360, *et seq.*, for the purpose of receiving evidence and deliberating on the application (Application) of Salt River Project Agricultural Improvement and Power District (Applicant or SRP) for a Certificate of Environmental Compatibility (Certificate) in the above-captioned case.

The following members and designees of members of the Committee were present at one or more of the hearing days for the evidentiary presentations, public comment, and/or the deliberations:

| | |
|------------------|---|
| Paul A. Katz | Chairman, Designee for Arizona Attorney General Mark Brnovich |
| Zachary Branum | Designee of the Chairman, Arizona Corporation Commission (Commission) |
| Leonard C. Drago | Designee for Director, Arizona Department of Environmental Quality |

| | | |
|---|------------------------|--|
| 1 | John R. Riggins | Designee for Director, Arizona Department of Water Resources |
| 2 | | |
| 3 | Mary Hamway | Appointed Member, representing incorporated cities and towns |
| 4 | | |
| 5 | Rick Grinnell | Appointed Member, representing counties |
| 6 | James Palmer | Appointed Member, representing agricultural interests |
| 7 | Margaret "Toby" Little | Appointed Member, representing the general public |
| 8 | Karl Gentles | Appointed Member, representing the general public |
| 9 | | |

10 The Applicant was represented by Bert Acken of Jennings, Strouss & Salmon,
 11 PLC, and by Karilee Ramaley of SRP. The following parties were granted intervention
 12 pursuant to A.R.S. § 40-360.05: Staff of the Arizona Corporation Commission,
 13 represented by Stephen Emedi and Kathryn Ust; Sierra Club represented by Court Rich
 14 and Eric Hill; Western Resource Advocates represented by Adam Stafford; and Randolph
 15 Residents represented by Dianne Post and Autumn Johnson.

16 At the conclusion of the hearing, the Committee, after considering the (i)
 17 Application, (ii) evidence, testimony and exhibits presented by Applicant and interveners,
 18 and (iii) comments of the public, and being advised of the legal requirements of A.R.S.
 19 §§ 40-360 through 40-360.13, upon motion duly made and seconded, voted 7 to 2 to
 20 grant the Applicant, its successors and assigns, this Certificate for construction of the
 21 Coolidge Expansion Project as described below.

22 **B. PROJECT OVERVIEW.**

23 The Coolidge Expansion Project (CEP or Project) will be located in the City of
 24 Coolidge, Pinal County, and consists of sixteen (16) General Electric LM6000 PC
 25 SPRINT NxGen individual simple-cycle combustion turbine generator units, each
 26 producing up to 51.25 megawatts (MWs), for a total of 820 MW, and associated

1 interconnection facilities including new 500 kV transmission lines and a new 500 kV
2 switchyard, which SRP may later convert to a 500/230 kV substation. The new
3 generation units will be located immediately adjacent to and south of the existing units at
4 Coolidge Generating Station. Sixteen (16) stacks, approximately 85 feet tall, will be
5 located adjacent to each combustion turbine generator unit. The Project will be located
6 entirely on land owned by SRP. A general location map of the Project showing the
7 general placement of the combustion turbine generator units and the interconnection
8 facilities is set forth in **Exhibit A**. Because this Project is totally contained on SRP-
9 owned land, SRP does not require a right-of-way to access the site.

10 CONDITIONS

11 This Certificate is granted upon the following conditions:

12 1. This authorization to construct the Project shall expire five (5) years from
13 the date this Certificate is approved by the Arizona Corporation Commission, with or
14 without modification. Construction of the Project shall be complete, such that the Project
15 is in-service within this five-year timeframe. However, prior to the expiration of the time
16 period, the Applicant may request that the Commission extend the time limitation.

17 2. In the event that the Project requires an extension of the term(s) of this
18 Certificate prior to completion of construction, the Applicant shall file such time
19 extension request at least one hundred and eighty (180) days prior to the expiration of the
20 Certificate. The Applicant shall use reasonable means to promptly notify the Board of
21 Supervisors of Pinal County, the City of Coolidge and all other cities and towns within a
22 five (5) mile radius of the Project, and all landowners and residents within a five (5) mile
23 radius of the Project, all persons who made public comment at this proceeding who
24 provided a mailing or email address, and all parties to this proceeding. The notification
25 provided will include the request and the date, time, and place of the hearing or open
26 meetings during which the Commission will consider the request for extension.

1 Notification shall be no more than three (3) business days after the Applicant is made
2 aware of the hearing date or the open meeting date.

3 3. During the development, construction, operation, maintenance and
4 reclamation of the Project, the Applicant shall comply with all existing applicable air and
5 water pollution control standards and regulations, and with all existing applicable
6 statutes, ordinances, master plans and regulations of any governmental entity having
7 jurisdiction including, but not limited to, the United States of America, the State of
8 Arizona, Pinal County, the City of Coolidge, and their agencies and subdivisions,
9 including but not limited to the following:

- 10 a. All applicable land use regulations;
- 11 b. All applicable zoning stipulations and conditions including but not
12 limited to, landscaping and dust control requirements;
- 13 c. All applicable water use, discharge and/or disposal requirements of the
14 Arizona Department of Water Resources and the Arizona Department of
15 Environmental Quality;
- 16 d. All applicable noise control standards and light control standards; and
- 17 e. All applicable regulations governing storage and handling of hazardous
18 chemicals and petroleum products.

19 4. The Applicant shall obtain all approvals and permits necessary to construct,
20 operate and maintain the Project required by any governmental entity having jurisdiction
21 including, but not limited to, the United States of America, the State of Arizona, Pinal
22 County, the City of Coolidge, and their agencies and subdivisions.

23 5. The Applicant shall comply with the Arizona Game and Fish Department
24 (AGFD) guidelines for handling protected animal species, should any be encountered
25 during construction and operation of the Project, and shall consult with AGFD or U.S.
26 Fish and Wildlife Service, as appropriate, on other issues concerning wildlife.

1 6. The Applicant shall design the Project's interconnection facilities to
2 incorporate reasonable measures to minimize electrocution of and impacts to avian
3 species in accordance with the Applicant's avian protection program. Such measures will
4 be accomplished through incorporation of Avian Power Line Interaction Committee
5 guidelines set forth in the current versions of *Suggested Practices for Avian Protection on*
6 *Power Lines* and *Reducing Avian Collisions with Power Lines* manuals.

7 7. The Applicant shall consult the State Historic Preservation Office (SHPO)
8 with respect to cultural resources. If any archaeological, paleontological, or historical site
9 or a significant cultural object is discovered on state, county or municipal land during the
10 construction or operation of the Project, the Applicant or its representative in charge shall
11 promptly report the discovery to the Director of the Arizona State Museum (ASM), and
12 in consultation with the Director, shall immediately take all reasonable steps to secure
13 and maintain the preservation of the discovery as required by A.R.S. § 41-844.

14 8. The Applicant agrees to establish a Community Working Group (CWG)
15 made up of the following members: up to 5 residents of the Randolph community; 1
16 member designated by the Pinal County Supervisors; 1 member designated by the City of
17 Coolidge; 2 members selected by SRP; 1 member designated by the Sierra Club, if
18 requested by the Randolph community; and 1 member designated by Western Resource
19 Advocates, if requested by the Randolph community. The Applicant shall act as advisor
20 to the CWG. CWG meetings shall be noticed to and be open to the general public. The
21 initial meeting shall take place on an evening or weekend in/or near the Community of
22 Randolph.

23 Applicant shall retain an independent facilitator, acceptable to the CWG, to
24 conduct the CWG meetings. It shall be the role of the facilitator to assist in conducting an
25 orderly and productive process. The facilitator may, if necessary, employ dispute
26 resolution mechanisms. The Scope of the CWG will include but shall not be limited to:

- Implementing a landscaping plan to:
 - visually screen the Project and mitigate noise
 - provide landscaping in Randolph public areas
- Reducing impacts of plant lighting within limits required for plant and employee safety
- Providing a grant writer to help the Randolph community seek federal and state support to address community needs
- Implementing job training and skills development for the residents of Randolph

9. Subject to approval of Pinal County and the City of Coolidge as applicable, the Applicant shall pave the following roads:

- Roads within the Randolph community
- Randolph Road between Arizona Boulevard and Vail Road
- Kleck Road between Arizona Boulevard and Vail Road
- Vail Road between Randolph Road and Kleck Road

10. The Applicant shall establish an annual scholarship program for Randolph residents with qualifications and timelines established by the CWG.

11. The Applicant shall support efforts to establish Arizona and National Historic Designations for Randolph.

12. In consultation with the CWG, the Applicant shall facilitate discussions with Pinal County, the City of Coolidge, and other appropriate authorities regarding infrastructure improvements for the Randolph community.

13. Applicant shall operate the Project so that during normal operations the Project shall comply with OSHA worker safety noise standards. Applicant agrees that it shall use reasonable efforts to minimize nighttime construction noise.

1 14. Applicant will discontinue use of groundwater at the existing facility upon
2 operation of the new facility and thereafter will use only stored surface water for power
3 plant purposes.

4 15. Applicant agrees to comply with all applicable federal, state and local
5 regulations relative to storage and transportation of chemicals used at the plant.

6 16. Applicant agrees to maintain on file with the City of Coolidge safety and
7 emergency plans relative to emergency conditions that may arise at the plant site. On at
8 least an annual basis Applicant shall review and update, if necessary, the emergency
9 plans. Copies of these plans will be made available to the public and on Applicant's web
10 site subject to the extent plans are not confidential. Additionally, Applicant will cooperate
11 with the City of Coolidge and the CWG to develop an emergency notification plan and to
12 provide information to community residents relative to potential emergency situations
13 arising from the plant or related facilities. Applicant agrees to work with the local area
14 police and fire departments to jointly develop on-site and off-site evacuation plans, as
15 may be reasonably appropriate. This cooperative work and plan shall be completed prior
16 to operation of the plant expansion.

17 17. Applicant shall install continuous emission monitoring equipment on the
18 new units and will make available on its website emissions data from both the existing
19 and new units according to EPA standards. Applicant shall provide information to the
20 public on its website in order to assist the public in interpreting the data, and provide
21 viable information in a reasonable time frame.

22 18. The Applicant shall comply with the notice and salvage requirements of the
23 Arizona Native Plant Law (A.R.S §§ 3-901 *et seq.*) and shall, to the extent feasible,
24 minimize the destruction of native plants during the construction and operation of the
25 Project.
26

1 19. The Applicant shall make every reasonable effort to promptly investigate,
2 identify and correct on a case-specific basis, all complaints of interference with radio or
3 television signals from operation of the Project addressed in this Certificate and where
4 such interference is caused by the Project take reasonable measures to mitigate such
5 interference. The Applicant shall maintain written records for a period of five (5) years of
6 all complaints of radio or television interference attributable to operations, together with
7 the corrective action taken in response to each complaint. All complaints shall be
8 recorded to include notation on the corrective action taken. Complaints not leading to a
9 specific action or for which there was no resolution shall be noted and explained. Upon
10 request, the written records shall be provided to the Staff of the Commission. The
11 Applicant shall respond to complaints and implement appropriate mitigation measures. In
12 addition, the Project shall be evaluated on a regular basis so that damaged insulators or
13 other line materials that could cause interference are repaired or replaced in a timely
14 manner.

15 20. If human remains and/or funerary objects are encountered during the course
16 of any ground-disturbing activities related to the construction or maintenance of the
17 Project, the Applicant shall cease work on the affected area of the Project and notify the
18 Director of the ASM as required by A.R.S. § 41-865 for private land, or as required by
19 A.R.S. § 41-844 for state, county, or municipal lands.

20 21. Within one hundred twenty (120) days of the Commission's decision
21 approving this Certificate, the Applicant shall post signs in or near public rights-of-way,
22 to the extent authorized by law, reasonably adjacent to the Project giving notice of the
23 Project. Such signage shall be no smaller than a roadway sign. The signs shall advise:

- 24 a. Future site of the Project;
25 b. A phone number and website for public information regarding the
26 Project; and

1 c. Refer the Public to the Docket [https://edocket.azcc.gov/search/docket-](https://edocket.azcc.gov/search/docket-search/item-detail/26170)
2 [search/item-detail/26170](https://edocket.azcc.gov/search/docket-search/item-detail/26170).

3 Such signs shall be inspected at least once annually and, if necessary, be repaired
4 or replaced, and removed at the completion of construction.

5 The Applicant shall make every reasonable effort to communicate the decision
6 either approving or disapproving the Certificate in digital media.

7 22. Upon the approval of this Certificate by the Committee, the Applicant shall
8 provide the City of Coolidge and all other cities and towns within five (5) miles of the
9 Project, the Board of Supervisors for Pinal County, and known builders and developers
10 who are building upon or developing land within one (1) mile of the Project with a
11 written description, including the approximate height and width measurements of all
12 structure types, of the Project. The written description shall identify the location of the
13 Project and contain a pictorial depiction of the facilities being constructed. The Applicant
14 shall also encourage the developers and builders to include this information in their
15 disclosure statements. Upon approval of this Certificate by the Commission, the
16 Applicant may commence construction of the Project.

17 23. The Applicant shall use non-specular conductor and non-reflective surfaces
18 for the transmission line structures on the Project.

19 24. The Applicant shall be responsible for arranging that all field personnel
20 involved in the Project receive training as to proper ingress, egress, and on-site working
21 protocol for environmentally sensitive areas and activities. Contractors employing such
22 field personnel shall maintain records documenting that the personnel have received such
23 training.

24 25. The Applicant shall follow the most current Western Electricity
25 Coordinating Council (WECC) and North American Electric Reliability Corporation
26 (NERC) planning standards, as approved by the Federal Energy Regulatory Commission

1 (FERC), National Electrical Safety Code (NESC) standards, and Federal Aviation
2 Administration (FAA) regulations.

3 26. The Applicant shall participate in good faith in state and regional
4 transmission study forums to coordinate transmission expansion plans related to the
5 Project and to resolve transmission constraints in a timely manner.

6 27. When Project facilities are located parallel to and within one hundred (100)
7 feet of any existing natural gas or hazardous pipeline, the Applicant shall:

8 a. Ensure grounding and cathodic protection studies are performed to show
9 that the Project's location parallel to and within one hundred (100) feet
10 of such pipeline results in no material adverse impacts to the pipeline or
11 to public safety when both the pipeline and the Project are in operation.
12 The Applicant shall take appropriate steps to ensure that any material
13 adverse impacts are mitigated. The Applicant shall provide to Staff of
14 the Commission, and file with Docket Control, a copy of the studies
15 performed and additional mitigation, if any, that was implemented as
16 part of its annual compliance-certification letter; and

17 b. Ensure that studies are performed simulating an outage of the Project
18 that may be caused by the collocation of the Project parallel to and
19 within one hundred (100) feet of the existing natural gas or hazardous
20 liquid pipeline. The studies should either: (a) show that such simulated
21 outage does not result in customer outages; or (b) include operating
22 plans to minimize any resulting customer outages. The Applicant shall
23 provide a copy of the study results to Staff of the Commission and file
24 them with Docket Control as part of the Applicant's annual compliance
25 certification letter.
26

1 28. The Applicant shall submit a compliance certification letter annually,
2 identifying progress made with respect to each condition contained in this Certificate,
3 including which conditions have been met. The letter shall be submitted to Commission's
4 Docket Control commencing on March 16, 2023. Attached to each certification letter
5 shall be documentation explaining how compliance with each condition was achieved.
6 Copies of each letter, along with the corresponding documentation, shall be submitted to
7 the Arizona Attorney General's Office. With respect to the Project, the requirement for
8 the compliance letter shall expire on the date the Project is placed into operation.
9 Notification of such filing with Docket Control shall be made to the Board of Supervisors
10 for Pinal County, City of Coolidge, all parties to this Docket, and all parties who made a
11 limited appearance in this Docket.

12 29. The Applicant shall provide a copy of this Certificate to the Board of
13 Supervisors for Pinal County and the City of Coolidge.

14 30. Any transfer or assignment of this Certificate shall require the assignee or
15 successor to assume, in writing, all responsibilities of the Applicant listed in this
16 Certificate and its conditions as required by A.R.S. § 40-360.08(A) and R14-3-213(F) of
17 the Arizona Administrative Code.

18 31. In the event the Applicant, its assignee, or successor, seeks to modify the
19 Certificate terms at the Commission, it shall provide copies of such request to the Board
20 of Supervisors for Pinal County, the City of Coolidge, all parties to this Docket, and all
21 parties who made a limited appearance in this Docket.

22 32. The Certificate Conditions shall be binding on the Applicant, its successors,
23 assignee(s) and transferees and any affiliates, agents, or lessees of the Applicant who
24 have a contractual relationship with the Applicant concerning the construction, operation,
25 maintenance or reclamation of the Project. The Applicant shall provide in any
26 agreement(s) or lease(s) pertaining to the Project that the contracting parties and/or

1 lessee(s) shall be responsible for compliance with the Conditions set forth herein, and the
2 Applicant's responsibilities with respect to compliance with such Conditions shall not
3 cease or be abated by reason of the fact that the Applicant is not in control of or
4 responsible for operation and maintenance of the Project facilities.

5 33. During the proceeding, neighbors to the plant site raised significant
6 concerns about the impact of the plant expansion on residential property values. In
7 performing each of the conditions in this Order, Applicant, in conjunction where
8 applicable with the CWG, Pinal County, City of Coolidge and the Randolph community,
9 shall consider and attempt to maximize the positive effect of its activities on the values of
10 the homes in the surrounding neighborhoods.

11 **FINDINGS OF FACT AND CONCLUSIONS OF LAW**

12 This Certificate incorporates the following Findings of Fact and Conclusions of
13 Law:

14 1. The Project aids the state and the southwest region of the United States in
15 meeting the need for an adequate, economical, and reliable supply of electric power.

16 2. The Project aids the state, preserving a safe and reliable electrical power
17 system.

18 3. During the course of the hearing, the Committee considered evidence on
19 the environmental compatibility on the Project as required by A.R.S. § 40-360 *et seq.*

20 4. The Project and the conditions placed on the Project in this Certificate
21 effectively minimize the impact of the Project on the environment and ecology of the
22 state.

23 5. The conditions placed on the Project in this Certificate resolve matters
24 concerning balancing the need for the Project with its impact on the environment and
25 ecology of the state arising during the course of the proceedings, and, as such, serve as
26 findings and conclusions on such matters.
